IL DESIGN COME STRUMENTO DI TRASFORMAZIONE SOCIALE

Il design è sito nel DNA dell’azienda: uno strumento che indaga e risolve le esigenze del vivere contemporaneo, migliorando così la vita delle persone. La sintesi di questa ormai lunga esperienza di LAGO si condensa in un Manifesto di undici punti che tratteggia gli elementi chiave della sua filosofia. Il punto 6, idealmente al centro del Manifesto, contiene la sorpresa, l’inaspettato, ciò che non può essere scritto o previsto. Il dinamismo e la sfida continua dell’undicesimo punto racchiudono l'anima giovane del brand in un’ottica di continuo progresso, mantenendo sempre intrinseca la sua evoluzione sostenibile.

DESIGN AS A TOOL FOR SOCIAL TRANSFORMATION

Design is in the company’s DNA. We see it as a tool for diving into the needs of contemporary living and offering solutions to improve people’s lives. LAGO’s now extensive experience has been condensed into a Manifesto: 11 points outlining the key elements of its philosophy. Point 6, right in the middle, is where the surprise is hidden – something unexpected and unpredictable. The dynamic, continuous challenging of point 11 encapsulates the brand’s young vibe, working constantly towards progress, while remaining faithful to sustainable development at the company’s core.

- 01

Siamo immediati e semplici.
*We are immediate
and straight-forward.*
- 02

Progettiamo interni per il tuo vero io.
We design interiors for your real self.
- 03

Crediamo nelle relazioni umane:
atomi e bit.
*We believe in human relationships:
atoms and bits.*
- 04

Abbiamo una bussola:
Cervello Cuore Coraggio.
*We have a compass:
Head Heart Courage.*
- 05

Pensiamo il pieno
per far vivere il vuoto.
*We conceive what’s solid
to breathe life into the void.*
- 06

.....
.....
- 07

Vediamo la bellezza
nella visione d’insieme.
*We see beauty
in a holistic way.*
- 08

Produciamo l’essenziale,
perchè duri nel tempo.
*We produce what’s essential,
so that it lasts over time.*
- 09

Forniamo un alfabeto,
ma il design sei tu.
*We provide an alphabet,
but you are the designer.*
- 10

Amiamo creare il nuovo.
Per questo ci viene facile.
*We love creating what’s new.
That’s why it comes easy.*
- 11

Mai fermi.
Never stop.

LAGO FABBRICA, BIOARCHITETTURA SOSTENIBILE

Disegnata come una grande casa, permeata dalla luce naturale dalle trasparenti pareti perimetrali, LAGO Fabbrica è il luogo dove prendono forma gli arredi. Progettata secondo i principi della bioarchitettura in un'area di oltre 13.000 mq, la struttura - grazie al sistema di geotermia - riduce il fabbisogno energetico, garantendo un ambiente confortevole in cui la persona viene sempre posta al centro. L'azienda infatti segue gli standard imposti dalla certificazione ISO 45001, che ha lo scopo di migliorare la sicurezza, preservare la salute e favorire il benessere dei dipendenti, limitando problemi e infortuni. Per quel che concerne invece il sistema di gestione ambientale, LAGO è certificata ISO 14001: una prova concreta della volontà di salvaguardare l'ambiente, prevenendo l'inquinamento e riducendo il consumo di energia e risorse.

LAGO FABBRICA, SUSTAINABLE BIO-ARCHITECTURE

Designed like a large house, with natural light streaming in through the perimeter window walls, LAGO Fabbrica is where the company's furniture comes to life. An example of bio-architecture, spanning some 13,000 square metres, the factory has a geothermal system that reduces its energy requirements and creates a comfortable environment putting people at the heart. The company follows the standards imposed by ISO 45001 certification, which aims to improve safety, preserve health and promote the well-being of employees, avoiding problems and accidents. On the other hand, as far as the environmental management system is concerned, LAGO is ISO 14001 certified: concrete proof of the company's desire to safeguard the environment, preventing pollution and reducing the consumption of energy and resources.

QUALITÀ E AZIENDA 4.0

L'innovazione è sempre stata insita nella visione a lungo termine di LAGO per lo sviluppo degli arredi, ma anche per le scelte a livello produttivo. Permeata di cultura lean come logica di miglioramento continuo, l'azienda rispecchia un pensiero volto ad offrire totale flessibilità, per rispondere alle richieste del mercato e garantire massimi standard qualitativi. Negli ultimi anni il sito produttivo si è evoluto diventando un'azienda 4.0 grazie ad investimenti mirati per l'automazione dei processi produttivi. Tra questi, sistemi di trasformazione a lotto uno, organizzazione di isole produttive specializzate per linee di prodotto e un avveniristico sorter. Alla macchina viene sempre affiancato il meticoloso lavoro dell'uomo che garantisce ulteriore attenzione al dettaglio, preservando l'eccellenza del saper fare e del Made in Italy.

QUALITY AND THE 4.0 COMPANY

Innovation has always been part of LAGO's long-term vision for designing its furniture, but also informing its production decisions. Permeated with lean culture as a logic of continuous improvement, LAGO wants to offer absolute flexibility, so as to respond to market demands and ensure the highest quality standards. The production site has evolved in recent years through targeted investments in production automation systems, morphing into a 4.0 company. These systems include transformation to a made-to-order process for customised orders from the outset, specialist production islands organised by model, and a futuristic sorter. Humans are always there to guide the work of the machines, checking assembly and quality control to guarantee an additional level of attention to detail, preserving its Made in Italy flair and finesse.

DESIGN DNA

SOSPENSIONE E LEGGEREZZA

La sospensione totale di basi, pensili e colonne è uno degli elementi distintivi delle cucine LAGO, che genera un grande senso di leggerezza, regala la percezione di ambienti più spaziosi e permette di ottenere la massima ergonomia. Dalla costante sperimentazione ingegneristica sono nati raffinati sistemi per la sospensione di cucine a parete e di isole, che permettono di risolvere e semplificare ogni tipo di installazione, garantendo affidabilità.

LIGHT ELEVATION

One of the distinguishing features of LAGO's kitchens is their wall-mounted, suspended designs for base, wall and tall units. These create an ultra-light, spacious feel and an ergonomic design for the space. LAGO is constantly experimenting with new ways of engineering its products, finding elegant solutions to elevate its designs, for wall-mounted kitchens and elevated islands that resolve and simplify installation, and ensure reliability.

TECNOLOGIA E DESIGN

Grazie all'estro tecnico creativo nasce la maniglia Flapp, un'apertura brevettata, funzionale ed ergonomica: un segno impercettibile che preserva il design essenziale del prodotto. Dal connubio di differenti materiali e tecnologie, che includono originali profili in alluminio, il sapiente impiego dell'acciaio armonico, fino anche a lavorazioni al laser, prende vita una soluzione unica che non interrompe le venature di marmi o legni.

TECHNOLOGY AND DESIGN

Flapp represents a technical, creative feat. The handle is both practical and ergonomic, and features a patented design. Leaving barely a trace, it preserves the product's minimalist lines. This unique solution leaves the grain of your marble or wood finish uninterrupted, and combines different materials and technologies including an original aluminium profile, skilful use of spring steel, and even laser machining.

PUREZZA DEI VOLUMI

Il design LAGO fonda le sue radici nell'essenzialità e nella pulizia delle forme, aspetti che rendono gli arredi senza tempo e in grado di dialogare con differenti stili e contesti. La perfetta integrazione di sottili top, ante e fianchi dello stesso materiale, e lo sviluppo innovativo di maniglie che risultano segni impercettibili, danno vita a volumi puri che preservano la raffinatezza formale delle cucine.

PURE VOLUMES

LAGO design centres around minimalist, clean-cut forms that create timeless furniture to fit different styles and contexts. Thin tops, doors and sides are seamlessly integrated into the product design in the same material, while the handles are innovatively designed to be ultra-subtle. The result is a collection of pure forms that preserve a real sense of elegance in the kitchen.

CREATIVITÀ PROGETTUALE

Grazie al suo design modulare, LAGO lascia spazio alla massima creatività. Volumi essenziali si integrano dando vita a cucine dinamiche e destrutturate, che regalano suggestivi contrasti materici o cromatici. La progettazione libera di basi a terra o sospese, complanari o con diverse profondità, assieme ai vari elementi distintivi quali piani snack in molteplici forme, genera soluzioni cucite sulla base delle singole esigenze e personalità.

DESIGN AND CREATIVITY

Thanks to its modular designs, LAGO leaves all the space you need to be creative. Combine minimalist forms to create dynamic, deconstructed kitchen designs with striking colour and textural contrasts. Tailor-made solutions to suit your needs and personality can be created with freely designed floor-standing or wall-mounted base units in different depths or flush with each other, plus various distinctive features such as a breakfast bar in a variety of different forms.

L'AUTENTICITÀ DI WILDWOOD

Le venature tridimensionali di un massello alleggerito di rovere, proveniente da foreste certificate, solcano i volumi delle cucine, esprimendo un carattere autentico e contemporaneo, grazie al design essenziale del prodotto e al dialogo con differenti materiali tra i quali il vetro. Wildwood offre una superficie con 4mm di legno nobile – contro i normali 0,6 mm – e un trattamento termico lo rende estremamente resistente all'usura e impermeabile ai liquidi.

AUTHENTIC WILDWOOD

Lightweight solid oak is sourced from certified forests and used to carve out the kitchen designs. A 3D grain adds authentic, contemporary character, with simple designs made by mixing and matching with different materials such as glass. Wildwood boasts a 4 mm hardwood surface – much more than the usual 0.6 mm. Plus, heat treatment makes the surface waterproof and extremely resistant to wear.

VETRO, RIFLESSI DI LUCE

Il vetro è un materiale nobile, formalmente perfetto, che grazie al continuo dialogo con la luce regala riflessi cangianti e dona profondità al colore. Il trattamento di tempra termica gli conferisce una resistenza 6 volte maggiore rispetto al normale, garantendo così la solidità e sicurezza dei prodotti. La continua implementazione di processi sostenibili e l'impiego di vernici bio ha permesso di ridurre del 34% la produzione di CO₂ del processo di laccatura.

GLASS, REFLECTIONS OF LIGHT

Glass is a noble, flawless material that adds depth to colour and glistens with iridescent reflections as it interacts with light. A heat-tempering process makes it six times stronger, ensuring the products are solid and safe. Continuous implementation of sustainable processes and use of organic lacquers has enabled a 34% reduction in CO₂ production during the lacquering process.

XGLASS, INNOVAZIONE SOSTENIBILE

L'innovativa tecnologia XGlass permette di coniugare la resistenza e la perfezione del vetro al fascino di molteplici materiali nobili, senza l'effettivo consumo di queste risorse in natura. Grazie a processi digitali, le venature dei marmi mantengono continuità tra le superfici, esaltando il valore e l'effetto monolitico dei volumi. Il vetro inoltre, rispetto ai marmi, è resistente agli acidi e utilizzabile in spessori sottili, contenendo pesi e aumentando la durata e le performance del prodotto.

XGLASS, SUSTAINABLE INNOVATION

Innovative XGlass technology combines the resistance and precision of glass with the appeal of different noble materials, without actually consuming any natural resources. Thanks to digital processing, marble veining is made to flow continuously across the surfaces, giving the pieces a monolithic effect and enhancing their aesthetic value. Glass, unlike marble, is also resistant to acids and can be cut thinly, decreasing the weight of the product while increasing its durability and performance.

ELEGANTI TRASPARENZE

Dalla ricerca costante di soluzioni originali e contemporanee, sono nati elementi unici che conferiscono valore e rendono distintivi i prodotti LAGO. I contenitori Glass, progettati per custodire ed esporre la creatività del cucinare, si integrano a volumi monolitici diventando dettagli preziosi. Il vetro regala eleganti trasparenze e, grazie alla sua pregiata lavorazione, offre un'elevata percezione della qualità del prodotto.

SEE-THROUGH ELEGANCE

LAGO has created some unique elements that add value and make its products different, thanks to ongoing efforts to seek out original, contemporary ideas. Glass storage units designed to store and display your creativity in the kitchen complement the monolithic volumes, becoming invaluable design details. The glass material provides elegant see-through surfaces, while the fine workmanship gives the products a high-quality look and feel.

IL VALORE NEI DETTAGLI

LAGO reinterpreta l'apertura a gola rendendola un elemento di assoluto valore e progettabile grazie alla possibilità di integrare differenti materiali. La finitura interna infatti può essere abbinata all'anta, al top o andare in contrasto, modulando la percezione dei volumi. Un profilo in finitura acciaio spazzolato accoglie sottili fasce in vetro o MDi, proteggendole e rendendo l'apertura estremamente ergonomica e resistente.

VALUE IN THE DETAILS

LAGO has put its own spin on the groove handle opening, turning it into a value-added feature you can design, with a range of different materials to choose from. The interior finish can be chosen to match the door or top, or contrast to emphasise different sizes and depths. A brushed-steel profile features strips of glass or MDi to protect it and give the opening an ultra-ergonomic, resistant finish.

DIMENSIONE ARCHITETTONICA

Superfici scandite da fasce in vetro che eludono la percezione dei frontali, la continuità tra ante e fianchi, e l'assenza di maniglie grazie a sistemi di apertura brevettati, offrono soluzioni in grado di diventare elementi di architettura che si integrano con l'ambiente esistente. Le colonne e i pensili N.O.W. inoltre rendono la cucina dinamica, grazie alla possibilità di personalizzare le singole fasce in vetro con infinite combinazioni cromatiche.

ARCHITECTURAL DIMENSION

Surfaces with decorative glass inserts make the fronts practically imperceptible, while the doors and side panels run on in a continuum. A patented opening system also ensures a handleless finish. Together these features create an architectural design that blends in with the existing environment. You can also customise the individual glass inserts on the N.O.W. tall and wall units in an infinite combination of colours to create a dynamic kitchen design.

KITCH- ENS

36e8 KITCHEN

Design: Daniele Lago, 2009

Volumi puri dal design essenziale grazie alla precisa integrazione fra il top, l'anta e il fianco, e la presenza di maniglie impercettibili, caratterizzano la cucina 36e8. Elemento distintivo è la sospensione di basi e colonne che dona senso di leggerezza e percezione di maggiore spazio nell'ambiente. Grazie alla sua modularità è in grado anche di destrutturarsi e generare design dinamici dove differenti materiali dialogano tra loro, offrendo soluzioni funzionali ed ergonomiche.

Pure, minimalist shapes define the 36e8 kitchen, with a seamlessly integrated top, door and side panel, and handles you barely can tell are there. Wall-mounted base and tall units are the distinctive feature of the design, giving the composition a sense of lightness and creating a feeling of more space in the room. Due to its modular build, the range can also be remodelled, creating dynamic designs using different materials alongside one another, for a functional, ergonomic end result.

36e8 CUT KITCHEN

Design: Daniele Lago, 2024

Un segno deciso solca con continuità basi e colonne della cucina 36e8 Cut, una gola personalizzabile con differenti finiture che diventa un elemento di progettazione, modulando la percezione dei volumi con soluzioni monomateriche o in contrasto. Un profilo studiato per offrire un'apertura ergonomica, garantendo la massima resistenza e performance nel tempo. Grazie alla gamma di materiali, che spaziano dal laccato al vetro, dall'XGlass all'MDi, è possibile dare vita a composizioni che risolvono ogni esigenza di interior.

A decisive mark furrows through the base and tall units in the 36e8 Cut kitchen. This groove handle is an element of the design and as such can be customised in different finishes. Change the way the units are perceived by opting for a single material or a contrasting look. The profile is designed to offer an ergonomic opening mechanism that stands the test of time. Create a composition that matches any interior design requirement with a range of materials including lacquer, glass, XGlass and MDi.

N.O.W. KITCHEN

Design: Daniele Lago, 2024

Fasce in vetro dal ritmo irregolare definiscono i volumi della cucina N.O.W., acronimo di “Not Only White”. La continuità di finitura sui fianchi e l’assenza di maniglie, grazie a sistemi di apertura brevettati che eliminano la percezione delle ante, generano un elemento architettonico che si integra perfettamente con l’ambiente. Le raffinate trasparenze delle vetrinette in vetro fumè bronzo rappresentano un ulteriore dettaglio di valore e creano un’elegante alternanza tra contenimento ed esposizione.

The N.O.W. kitchen units are defined by irregular glass panels – N.O.W. stands for “Not Only White”. The kitchen becomes an architectural feature with a continuous finish across the side panels. Handleless, thanks to patented opening systems that make the doors seem barely there, it fits perfectly into the space. Exquisite transparent smoked-bronze glass makes for an extra value-added detail on the display units, providing elegant alternation between storage space and show space.

BATH- ROOMS

DEPTH BASIN

Design: Daniele Lago, 2013

Una finestra d'acqua trasparente creata su una mensola di otto centimetri di spessore. Il lavabo Depth gioca con il senso di vuoto e della profondità grazie al fondo inclinato in vetro trasparente. Il Wildwood, rovere dalle venature scolpite, si adatta perfettamente all'ambiente e permette di creare un piano raffinato. Grazie al termotrattamento è estremamente resistente ai liquidi per una rinnovata tenuta.

A transparent window of water created from an 8 cm thick shelf. The Depth basin plays with a feeling of an empty, open void with its inclined bottom in clear glass. Wildwood, made from oak with a sculpted grain, adapts perfectly to the space and creates an elegant surface. The material has been heat treated, making it highly resistant to liquids for renewed hold.

KLIF BASIN

Design: Daniele Lago, 2024

Dal fascino di un unico blocco di pietra scolpito prende forma un lavabo dai segni forti e dalle geometrie rigorose che si integra a funzionali basi contenitive. Grazie all'assenza di giunte e all'invisibile sistema di raccolta dell'acqua, il lavabo risulta estremamente elegante e funzionale. L'innovativo materiale MDi, realizzato in minerali naturali, offre elevate performance in termini di resistenza ai liquidi e ai prodotti detergenti.

Carved from a single sculpted block of stone, this statement washbasin has a bold, geometric design, and integrates into functional storage bases. Free of joins and with an invisible water-collection system, it is both extremely elegant and functional. The innovative MDi material made of natural minerals offers excellent resistance to liquids and cleaning products.

KERA BASIN

Design: Daniele Lago, 2019

Il Kera basin si distingue per essere estremamente pratico e innovativo grazie alla sua composizione in ceramica, la finitura in smalto opaco o lucido e le sue forme arrotondate. Utilizzabile in differenti contesti, il lavabo è integrabile sia a mensole che a basi, per soluzioni più contenitive. Disponibile in diverse colorazioni e misure, Kera si adatta perfettamente a qualsiasi esigenza di spazio creando un ambiente di design curato e raffinato.

The new Kera basin is particularly practical and original, thanks to its ceramic structure, matt and polish enamelled finish and rounded shape. It can be used in different contexts and adapts to both shelves and base units for solutions offering more storage space. Available in seven colours and five different sizes, it adapts perfectly to any space needs, creating a refined, designer bathroom space in which every detail has been carefully thought out.

Project 2845

Kera Basin

KERA BASIN – Bianco polished ceramic.

AIR SHELF – Wildwood chiaro.

36e8 MIRROR – Naturale mirror.

36e8 HANGING UNIT – Bronze smoked glass structure. Caramello polished glass back.

Kera Basin

KERA BASIN – Nero satin ceramic.

36e8 BASE – Wildwood naturale top. Nero matt glass fronts.

36e8 MIRROR – Naturale mirror.

ELYSSA BASIN

Design: Daniele Lago, 2024

Linee dolci e morbide disegnano un lavabo che poggia su basi contenitive o mensole materiche. Ovale o rotondo, il lavabo in ceramica è personalizzabile in differenti colorazioni per risolvere ogni esigenza di interior. Lo spessore sottile del bordo e l'eleganza contemporanea delle forme si fondono in un equilibrio perfetto, offrendo una sensazione di leggerezza nello spazio dedicato al benessere del corpo e della mente.

Soft, delicate lines outline this washbasin design, resting on storage base units or textured shelving. Made of ceramic, the basin is available in both an oval and round model. The finish can be personalised in a range of colours to suit all interior design requirements. Its slender edge and contemporary shape combine elegantly in a perfect balance, creating a light and airy feel in a space designed to regenerate mind and body.

Project 2847

Elyssa Basin

ELYSSA BASIN – Bianco polished ceramic.

AIR SHELF – Wildwood chiaro.

36e8 BASE – Argilla polished glass top and fronts.

ELYSSA BASIN - Bianco satin ceramic.

36e8 CUT BASE - Havana polished glass top, fronts and groove handle.

PUNTO MIRROR - Naturale mirror.

CELLULE BASIN

Design: Daniele Lago, 2013

Un lavabo circolare a parete, laccato esternamente, attorno a cui sono posizionabili, come piccole cellule, vassoi in legno Wildwood o in vetro colorato e portasciugamani in metallo. La semplicità di forme crea una perfetta composizione che regala un ambiente innovativo e rilassante dove potersi prendere cura di sé stessi.

This circular, wall-mounted basin, lacquered on the outside, is surrounded by small circular stands that look like cells, either in Wildwood or coloured glass, as well as a metal towel rail. The simple shapes make for a perfect composition that creates an innovative, relaxing space in which to take care of yourself.

Cellule Basin

CELLULE BASIN – Blu scuro lacquer.
Wildwood grigio and argilla polished glass shelves.

SKIN BASIN

Design: Daniele Lago, 2013

Il rivestimento della parete sembra staccarsi come una pelle per dare forma ad un lavabo elegante e raffinato, supportato da una solida struttura in acciaio e rivestibile in resina o con tessere di mosaico da 2 x 2 cm. Un elemento di design innovativo dove l'acqua grazie alla perfetta angolazione può defluire in modo armonioso. Un lavabo che trova la sua perfetta collocazione in ambienti raffinati ed eleganti, ma anche in hotel, ristoranti o in spazi wellness.

It looks as though the decoration is peeling off the wall like skin to give form to an elegant, refined washbasin. Supported by a solid steel base and clad in resin or with mosaic tiles measuring 2 x 2 cm. This innovative designer piece is perfectly angled so that the water drains away harmoniously. The basin is ideal for sophisticated and elegant private spaces, as well as in hotels, restaurants or wellness areas.
